SUMMARY

Fresher Software QA & Automation Tester with a certification in Manual Testing and AI-Powered Automation Testing from Certiwise. Learned Manual Testing, Automation Testing and Mobile App Testing through hands-on projects. Skilled in Web UI Automation, API Testing and Performance Testing. Knows Functional, Regression, Exploratory, Smoke & Sanity and End-to-End testing across the SDLC and STLC. Looking for an entry-level QA role.

EDUCATION

- **Lovely Professional University (LPU)** – M.Sc. in Information Technology — August 2026 – Present
- **Lovely Professional University (LPU)** – Bachelor of Arts (B.A.) — April 2023 – June 2026

PROJECTS

Glam & Go Beauty Booking – Mobile App (Android/iOS) | Beauty & Wellness
A beauty booking app where users find salons and services, book appointments, make payments and track bookings.
Modules covered: Sign Up, Login & OTP; Service & Salon Search (filters, sorting); Appointment Booking & Rescheduling; Payment (UPI / Card / Wallet); Booking History & Cancellation; Notifications & Reminders; User Profile.

- Manual and functional testing on mobile devices; wrote and ran test cases for the full booking flow.
- Built Appium scripts for mobile test flows; performed regression testing after each new build.
- Evaluated negative and boundary cases (invalid OTP, past dates, double booking); verified UI on different screen sizes, Android/iOS versions, slow network and interruptions (call, low battery).
- Logged and tracked bugs in Jira; validated APIs using Postman.

Imghippo – Website (Free Image Hosting) | Automation Testing (Playwright)
A free website to store images online. Users upload, compress, convert and edit images; developers connect using a REST API and Node.js or Python SDKs.
Modules examined: Image upload and link; Compress, Convert & Edit; invalid inputs and error messages; menu, buttons and links on all pages; page loading and layout.

- Wrote and ran Playwright test scripts for the main pages and features; checked results and identified failed tests.
- Communicated bugs with clear steps and screenshots.

CERTIFICATION

Manual Testing & AI-Powered Automation Testing (Industrial Training) — May 2026 – Present
Certiwise, Mohali

- Learned manual testing of web and mobile applications, including functional, UI and regression checks.
- Wrote defect reports with clear reproduction steps, expected vs. actual results and screenshots.
- Automated web UI test cases using Playwright (Python), covering registration, login and other key user flows.
- Automated mobile app test cases using Appium, covering the main booking flows of the Glam & Go app.
- Used AI-powered tools such as Google Antigravity in VS Code to generate, refine and maintain automation test scripts.

SKILLS

- **Testing:** Manual & Automation Testing, Functional, Regression, Smoke & Sanity, Exploratory, End-to-End, API, Cross-Browser, Test Case Design & Execution, Bug Reporting, Defect Tracking
- **Automation & API:** Playwright (Python), Appium, Postman, REST API Testing, Apache JMeter
- **Mobile:** Android & iOS App Testing, Device/OS Compatibility, Interruption & Network Testing
- **Tools:** Jira, GitHub, GitHub Actions, VS Code, Google Antigravity
- **Languages:** Python, JavaScript
- **Methodologies:** SDLC, STLC, Agile, Scrum

KEY STRENGTHS

Attention to Detail, Analytical Thinking, Problem Solving, Communication, Quick Learner, Adaptability, Time Management
